

TIMRIDE-UP

**AN EFFECTIVENESS CONFIRMED
BY OUR STUDIES:**

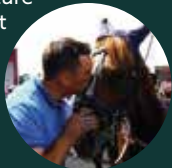

65 horses per group

Nearly 300 gastroscopies performed

*Significant improvement in gastric
comfort in both studies*

OUR USERS SPEAK OUT :

« I participated in the two efficacy studies of TIMRIDE-UP: in 2021 on 2 years old and in 2022 on mature horses. On some horses with significant ulcers, I observed an improved appetite, a recovery of condition, reduced nervousness but increased energy and willingness to work. Since the trials, I have continued to supplement the horses during competition periods. »

Cyrille BUHIGNE
French trotters trainer

« I participated in the efficacy evaluation studies of the TIMRIDE-UP supplement by scoring the severity of ulcers. In this overall population of 110 training trotters, approximately 80% of the horses had significant ulcer scores, which is considerable. In both studies, the ulcer scores of the horses in the TIMRIDE-UP group were reduced compared to the control group, which proves the product's effectiveness in reducing the impact of this condition on the comfort and performance of the horses. I regularly prescribe TIMRIDE-UP for horses with moderate ulcer grades who are anxious or stressed. I have received excellent feedback from owners who find their horses transformed: they eat better, are calmer, and more responsive in their work. »

Anne COUROUCÉ
Professor at the Nantes Veterinary School, France

It's your turn to give it a try!

TIMRIDE-UP

Gastric comfort for horse performance

**Our solution for gastric comfort
1.5 kg bucket = 1 month of use**

Do not filter

INSTRUCTIONS FOR USE

To be distributed twice a day, mixed with the daily ration at a rate of:

- Adult horse: 20 g/horse/meal
- Pony/Foal: 10 g/horse/meal

One 17.5 mL mesure contains approx. 20 g
Minimum period use : 1 month

**FOR THE GASTRIC COMFORT OF YOUR HORSES,
CHOOSE EFFICIENCY WITH TIMRIDE-UP!**

TIMRIDE-UP

Gastric comfort for horse performance

SCIENTIFICALLY proven efficacy

NON-DOPING Formula - verification of the absence of NOPS banned substances

GASTRIC comfort

* NOPS : Naturally occurring prohibited substances

3 FACTS TO KNOW ABOUT GASTRIC ULCERS

Gastric ulcers affect on average⁽¹⁾ :

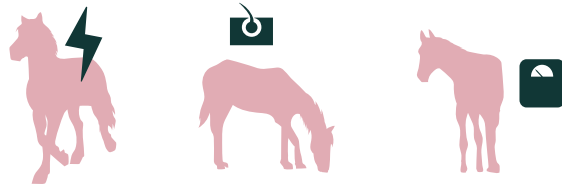

90%
of race
horses

75%
of sport
horses

40%
of leisure and
breeding horses

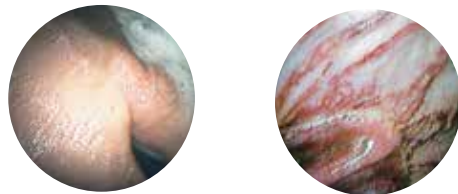

⁽¹⁾ Murray (1999) and Murray et al. (1990), Y. Tamzali, 2006

EXTERNAL SIGNS OF ULCERS can be a prickly coat, a decrease in appetite, weight loss, a stressed horse...

BUT ulcers are also often without apparent clinical signs

Gastroscopy is the **ONLY RELIABLE METHOD** to **DIAGNOSE ULCERS**. During this procedure, ulcers are graded from 0 for a healthy stomach to 4 for a stomach with severe ulcers.

Healthy

Ulcer grade 4

TIMRIDE-UP - SCIENTIFICALLY PROVEN EFFICACY

Gastric acidity, in certain situations such as intensive training, can create lesions in the stomach lining. These lesions or gastric ulcers can cause pain and poor performance. (Sykes et al., 2015)

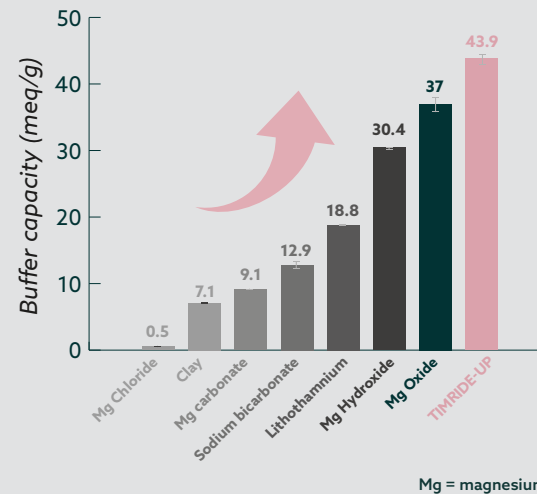

TIMRIDE-UP, thanks to its acid neutralisation efficiency, is your horse's ally, for **GASTRIC COMFORT** at the service of performance.

This unique product is geared towards horses with high energy diets, in training, competing or in situations where stomach acidity can cause gastric discomfort.

TIMRIDE-UP, is a combination of different sources of Magnesium Oxide from natural origin used to promote gastric comfort in horses with optimised action kinetics. Its efficacy has been proven both *in-vitro* and *in-vivo*.

NEUTRALIZING capacity of acid in the stomach

In-vitro study at pH=2.5, Inovalys 2021

TIMRIDE-UP has a higher neutralizing capacity than other buffer solutions.

RESULTS CONFIRMED BY FIELD STUDIES

Visible improvement of **GASTRIC comfort**

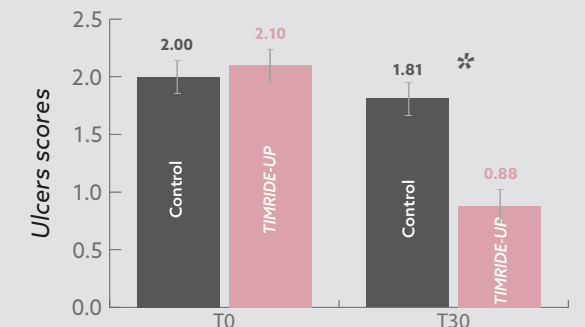

Before supplementation

After 1 month of supplementation

An improvement in **gastric comfort** visible from the inside after 1 month of supplementation with **TIMRIDE-UP**.

EVOLUTION of mean scores (\pm se⁽²⁾) of gastric ulcers in the control and **TIMRIDE-UP** groups

In-vivo study on 40 trotters for 1 month, Equi-test, 2021

⁽²⁾se : standard error, * : $p < 0,05$

TIMRIDE-UP thanks to its acid neutralizing capacity, improves gastric comfort.
